

Enterprise Order Approval and Processing Policy

1. Purpose

This policy outlines the procedures and approval hierarchy for processing sales orders within the ERP system.

2. Scope

Applies to all orders created through the ERP system, including online and offline transactions.

3. Order Classification

Orders are categorized as:

- **Standard Orders** ($\leq$ USD 1000)
- **High-Value Orders** ($>$ USD 1000)
- **Bulk Orders** ($>$ 50 items)
- **International Orders**

4. Approval Hierarchy

4.1 Orders $\leq$ USD 1000 $\rightarrow$ Auto-approved

4.2 Orders USD 1000–5000 $\rightarrow$ Supervisor approval required

4.3 Orders $>$ USD 5000 $\rightarrow$ Director approval required

5. Special Conditions

- Bulk orders must be validated by the **Sales Department**
- International orders require **compliance verification**
- Orders missing customer or billing data are automatically rejected

6. ERP Workflow Integration

Each order must:

- Be assigned a unique **Sales Order ID**
- Be linked to a **Customer ID**
- Maintain traceability across:
 - Order creation

- Approval stages
- Shipment and billing

7. Risk Control Measures

- Fraud detection checks for high-value orders
- Duplicate order detection
- Credit validation for customers

8. Processing Timeline

- Order validation: **same day**
- Approval cycle: **1–2 days**
- Fulfillment: **2–5 business days**

9. Audit and Monitoring

All order transactions are:

- Logged in ERP system
- Tracked for anomalies
- Available for audit and reporting
